As a launchpad for community transformation, our goal is to connect community members with opportunities that will unlock their potential and empower them. Your donations can help maximize our impact, enabling these platforms to function optimally & ultimately helping them to grow to their full potential. Here’s how:

- **R100**: Feed 10 learners in after school mentor sessions & sponsor a chess board.
- **R1000**: Cover the costs for a mentor's ICDL computer training.
- **R10000**: Pay for a student's gap year expenses in order to raise up another rural mentor.
- **R100000**: Build a community homestay to help accommodate more staff & volunteers to increase our capacity.

Be part of the revolution! Come volunteer or spread the word.

One of the key issues facing the South African labour market is as an excess of unskilled labour. - Department of Labour

Only 19% of rural children live with both their parents.

Household income below the poverty line. (R779 R/Month)

0% Internet access at home.

0% Employment & 1% with tertiary education.

As seen from the stats above, many factors play a role in the 3.5% youth employment crisis in rural South Africa. We aim to address this issue holistically, by investing in mentors in all areas mentioned above. To break the cycle of poverty, we make use of various platforms to establish a mentorship culture. We then help raise up the next-generation leaders through local mentors to inspire the youth with their own lives & tell stories of hope in their own context.
